

# Condor - 3D GPR Processing & Interpretation Software

## Activation Guide

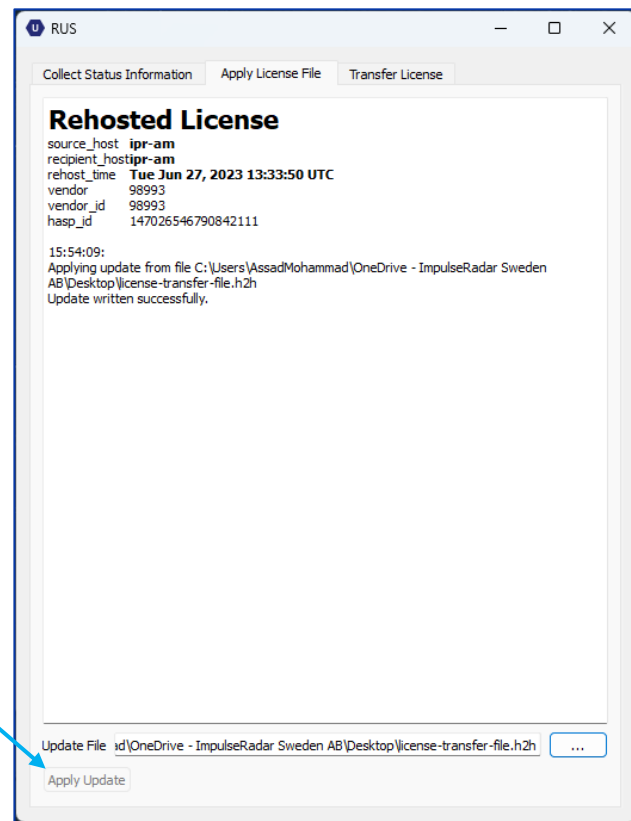

# Activate a New License

1. Extract the distribution folder you received by e-mail. It contains two executables:
  - i. Condor\_X.X.XX.exe where 'X.X.XX' is the Condor software version
  - ii. RUS\_KXQRX.exe utility
2. Insert the Condor license USB dongle
3. Install Condor\_X.X.XX.exe on the computer where the program will be used.
4. Now run the utility 'RUS\_KXQRX.exe'. On the first tab of the dialog window 'Collect Status Information', select radio-item 'Installation of new protection key' and click 'Collect Information' as shown in the figure.
5. Name the file with our PO number and date as shown in the figure, for example Q1111 23-05-16, save the c2v file and send it to [activation@impulseradar.se](mailto:activation@impulseradar.se)

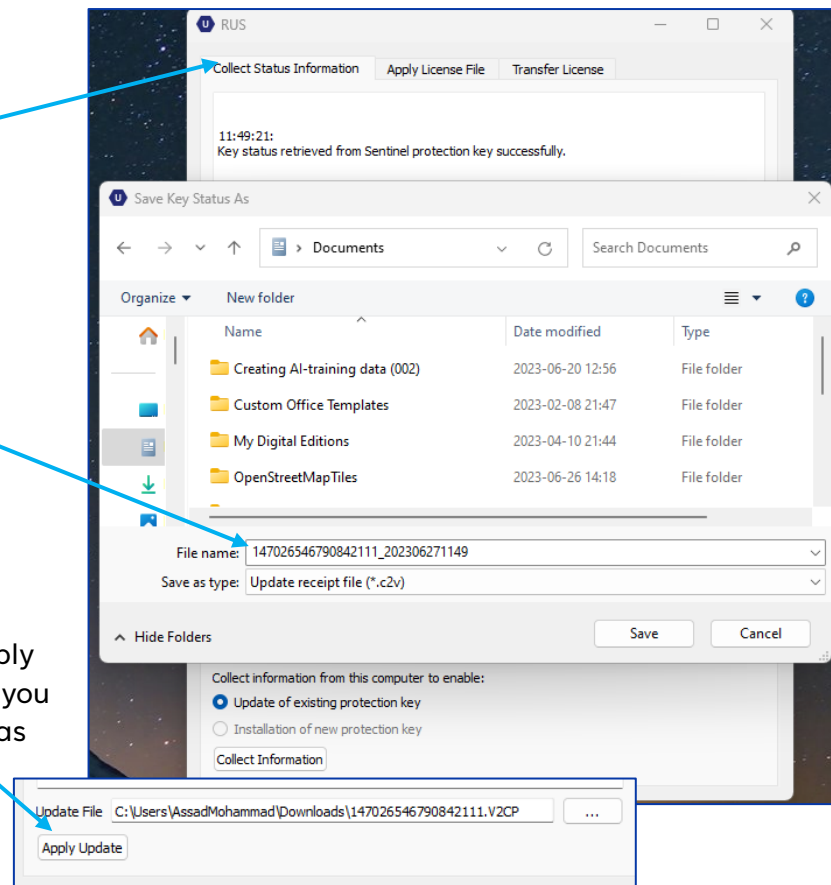

# Activate a New License

5. We will send you the activation v2c-file (\*.v2c). Save the file without changing its name on the computer where the program will be used.  
Note: the first digits, prior to the underscore of the file-name is the dongle id. We will refer to that in our future correspondence about this license. This ID will be linked to your PO in our business system
6. Again, run the utility 'RUS\_KXQRX.exe' after inserting Condor USB license dongle, but now choose Tab-2 'Apply License File', Press button  to browse and select the v2c-file you received from us. 'Apply Update' as shown in figure
7. Condor should be ready for use now.

# Renew an Existing License

1. Plug-in Condor license USB dongle
2. Run the utility 'RUS\_KXQRX.exe' and go to first tab of the dialog window 'Collect Status Information'. Select 'Update of existing protection key'. If you have an existing license, then the option 'Update of existing protection key' will be already selected.
3. Now, click 'Collect Information'
4. Save the file without changing its name and send it to [activation@impulseradar.se](mailto:activation@impulseradar.se). If possible, please refer to your PO number in the email.
5. We will send you the activation v2c-file for your renewal.
6. Save the v2c-file without changing the name.
7. Now, again, run the utility 'RUS\_KXQRX.exe', but choose Tab-2 'Apply License File'. Press button  to browse and select the v2c-file you received from us. Click 'Apply Update' button to apply the update as shown in figure
8. Condor should be ready for use now.

# Update to newer version

---

1. First uninstall the existing version. Before uninstalling make sure you don't have any projects located in the **Condor installation folder**. Every uninstall removes this folder and the data within. However, an uninstall does not do anything to Condor projects located in other folders.
2. Run newer Condor executable and install it.
3. Condor is ready. Upon start, you should see the most recent Condor projects
