

# Condor - 3D GPR Processing & Interpretation Software

## Activation Guide

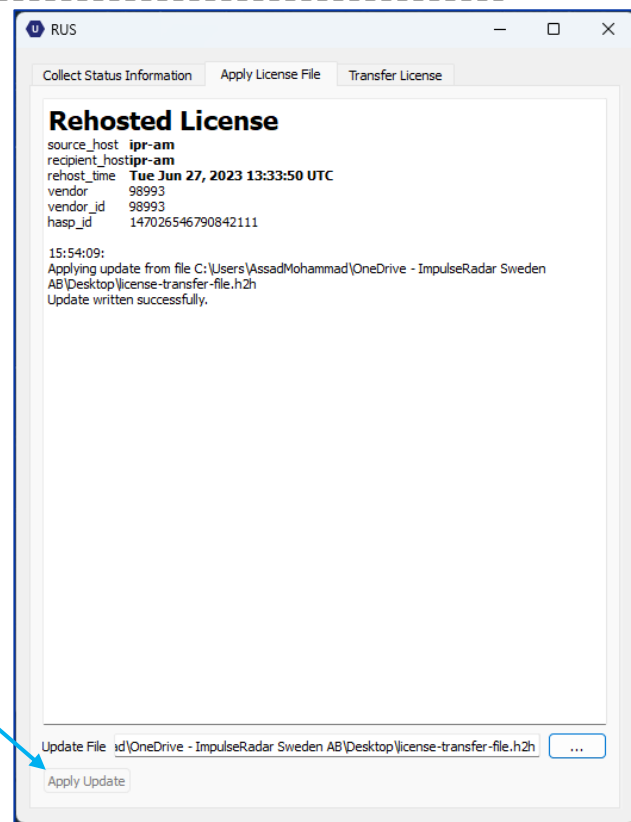

# Activate a New License

1. Extract the distribution folder you received by e-mail. It contains two executables:
  - i. Condor\_X.X.XX.exe where 'X.X.XX' is the Condor software version
  - ii. RUS\_OWQEI.exe utility
2. Install Condor\_X.X.XX.exe on the computer where the program will be used.
3. Now run the utility 'RUS\_OWQEI.exe'. On the first tab of the dialog window 'Collect Status Information', select radio-item 'Installation of new protection key' and click 'Collect Information' as shown in the figure
4. Name the file with our PO number and date as shown in the figure, for example Q1111 23-05-16, save the c2v file and send it to [activation@impulseradar.se](mailto:activation@impulseradar.se)

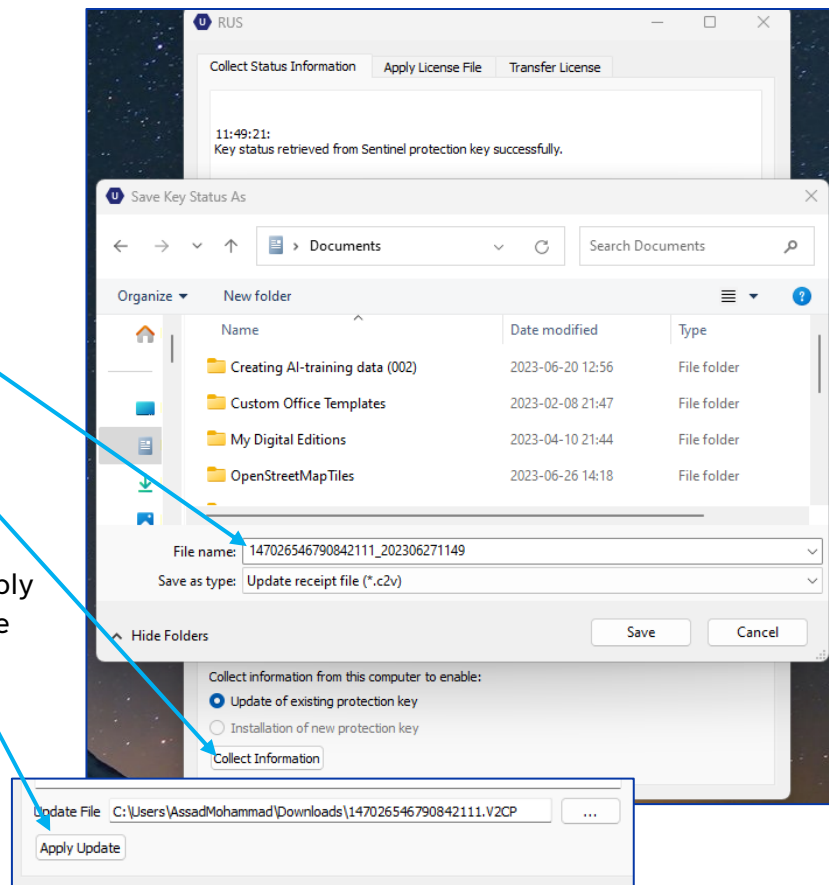

# Activate a New License

5. We will send you the activation v2cp-file (\*.V2CP). It now has an ID-number and we will refer to that in our future correspondence about this license. This ID will be linked to your PO in our business system.
6. Save the v2cp-file without changing its name on the computer where the program will be used.
7. Again, run the utility 'RUS\_OWQEI.exe', but now choose Tab-2 'Apply License File', Press button  to browse and select the v2cp-file you received from us. 'Apply Update' as shown in figure
8. Condor should be ready for use now.

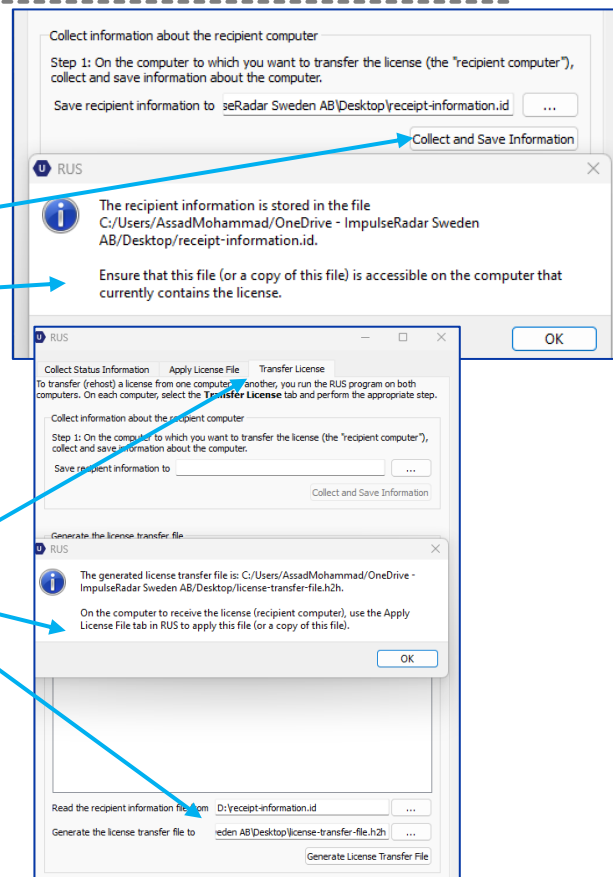

# Renew an Existing License

1. Run the utility 'RUS\_OWQEI.exe' and go to first tab of the dialog window 'Collect Status Information'. Select 'Update of existing protection key'. If you have an existing license, then the option 'Update of existing protection key' will be already selected.
2. Click 'Collect Information' as shown in the figure
3. Save the file without changing the name file and send it to [activation@impulseradar.se](mailto:activation@impulseradar.se). If possible, please refer to your PO number.
4. We will send you the activation v2cp-file for your renewal.
5. Save the v2cp-file without changing the name.
6. Now, again, run the utility 'RUS\_OWQEI.exe', but choose Tab-2 'Apply License File'. Press button [...] to browse and select the v2cp-file you received from us. 'Apply Update' as shown in figure
7. Condor should be ready for use now.

# Transfer an Existing License

1. To transfer (rehost) a license from one computer to another, you must run RUS\_OWQEI.exe program on both computers.
2. On the 'receipt computer' (to which you want to transfer the license), run the utility RUS\_OWQEI.exe and go to Tab-3 'Transfer License'. Select a suitable file name and click 'Collect and Save Information'. Upon successful execution, a confirmation box will open. Generated file extension is \*.id as shown in the figure
3. Now copy this file to the 'source computer' (the one which currently contains the license).
4. Now, run the utility 'RUS\_OWQEI.exe' on the 'source computer'. Navigate to Tab-3 'Transfer License'. Go to section 'Generate the license transfer file' and select the receipt information file (\*.id file). Also select a location for license transfer file (\*.h2h) and click option 'Generate License Transfer File'. A transfer license file will be generated as shown in the figure

# Transfer an Existing License

- Now, copy the license transfer file (\*.h2h) to the 'receipt computer' and run the utility RUS\_OWQEI.exe
- Navigate to Tab-2 'Apply License File', select the license transfer file (\*.h2h file), and click 'Apply Update'. Upon successful license transfer, a message will appear in the existing dialog box stating 'Update written successfully' as shown in the figure.
- Now Condor should be ready to run on the 'receipt PC'.
- Repeat the process if you wish to transfer the license back to the 'source computer' (now a 'receipt computer'). Please note you can always re-use the same receipt information file (\*.id) for a specific computer.
